

TIANJARA FALLS DAY TRIP

5th September 2010

Led by Glenn

WINDS 70-80 KPH; GUSTING TO 120KPH , the cars were rocking in the wind.

We left Maccas, Nowra @ 9.20, that's not late, and headed for Morton National Park .

Alan, Michelle, Susie & Henry had a 'Disco', everybody else had a Nissan- what else?, It was amazing what short times people had had in the Club, and here they all were raring to go.

Glenn has been in the club about 10 years.

Fred & Robin, 1 yr ,6 trips.

Alan & Michelle, about 12 yrs, reactivated after kids

Joy & John, 2 yrs, 1st trip.

Andy & Mel, 1 yr, 1st trip.

Richard & Lorraine 8 ½ years; (Lydia 14 yrs)

Flowers were beautiful: wattle, of course, egg & bacon, clematis still in flower, and many others lit up the bush.

Most of the blown down trees could be driven around, but a couple had to be sawn a bit and moved off.

6 cars and not one chainsaw!!

All the recent club members performed admirably. The Disco did wonders.

Luckily no trees fell while we had our lunch with 120kph gusts ALL THE TIME, I reckon. We were on a ridge, 357m up.

Our leader Glenn *didn't walk a puddle* and had to be snatched out.

A certain passenger thought it would all take a long time. She walked **back** to photograph some flowers. And wasn't missed. They all drove around the rim, and the convoy drove off. Fortunately after only a few minutes she was walked back for.

Only one leech (on Richard) and no other calamities.

There wasn't time for 'Swan Lake ' and after arvo tea we parted and went home.

Thanks, Glenn for the trip.

Thanks Richard for the transport.

Lydia
